Best practices successfully implemented by the Institution Dhenkanal Autonomous College, Dhenkanal

> ## Best practices I : *Green Campus*

Sustainable environment impacts students live positively. Green campus boost students' better knowledge retention capacity, environmental behaviors and community solidarity. Dhenkanal Autonomous College is making intensive effort to protect, conserve and sustenance of natural resources.
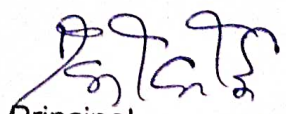

Objective :

- To promote eco-friendly practices, all departments have developed floral garden in front of their respective departments.
- To conserve green passage in campus. NSS wing of college has developed herbal garden with medicinal plants. College has been maintaining three orchards like Eden Garden, Lumbini and Kunjaban .
- To engage students inculcating spirit of nature's care through plantation and maintenance in campus. Volunteers of NCC, YRC and NSS have created a front facing green landscape in campus.
- To support sustainable and climate friendly environment, College has developed rain water harvesting project.

> ## Best Practices II : *Dhenkanal Autonomous College Staff Club*

It is a forum of all teaching staff of the college to conduct idea exchanges and cultural programme periodically. It creates holistic approach among staff towards the workplace.

Objective:

- To make administration of institution more accountable and enable effective interaction.
- To improve overall employee performance, empower team members with a sense of belongingness .It promotes team work in the workplace.
- To foster harmony among staff, the club conducts picnic, song and musical programmes.
- To encourage staff to celebrate achievements of all staff members. It conducts welcome ceremony of newly joined faculty as well as farewell of members receiving superannuation.
- To encourage research in the field of academics, staff club felicitates the member, who received PhD award and other research projects.
