

COURSES OF STUDY

M.Sc. in BOTANY

(Effective from the academic session 2023-2025)

Under Choice Based Credit System (CBCS)

**BERHAMPUR UNIVERSITY
BHANJA BIHAR
BERHAMPUR – 760 007 (GANJAM)
ODISHA
2023**

A brief profile of the Department

The department of Botany was established in the 1969 and founded by late Prof. Harihar Patanaik, a renowned algologist. Since its inception the department has grown appreciably, not only in terms of students and faculty strength but also in terms of the introduction of new courses, specializations and broadening research activities. The department is funded by the Government agencies in form of research grants from CSIR, UGC, DBT, DAE, MoEF and CC, Government of India, OFSD, S & T Department, Government of Odisha.

Program Outcome: M.Sc. in Botany

M.Sc. in Botany is a two years regular course, offered by PG department of Botany, Berhampur University. The present syllabus covers different components of theoretical and practical, as well as project work, field study and seminar presentations, which will help the students to get in depth knowledge on advanced Botany. During and after the completion of this course, students are expected to have an overall knowledge on Microbiology, different lower (Cryptogams) and higher plants (Phanerogams) diversity, their anatomy, physiology, biochemistry, biostatistics, reproductive biology, genetics, evolutionary history and Paleobotany etc. The students can learn about the origin and history of different cultivated plants, their economic importance, utilization and conservation of natural resources, different renewable and nonrenewable energy sources. The course curriculum is designed to introduce the students about sensory biology and stress physiology along with the hands on training on the theory and practical aspects of different instruments along with microbial and plant tissue culture. The course also encompasses an enriched knowledge on Ecology, environmental pollutions and different Environment laws. After completion of this course, students are expected to have practical knowledge on how to handle and operate basic instruments for their experimental purposes. They might have basic idea on experimental designing, project handling and writing their project reports, which may be beneficial for them in future and improve their capability to write notes and research articles for different scientific journals. The degree of M.Sc. Botany may open their path into academia/research career at national and international level as a scientist, as a teaching faculty or as a scholar or into different administrative positions.

Course Outcome

After successful completion of this course, students will be able to understand, the cell structures in relation to function of cells, the fundamental unit of life along with molecules present in cells, the concepts in prokaryotic, eukaryotic, and viral genetics, the central dogma of molecular biology (replication, transcription, and translation), the types of mutation, gene regulation and transposable element, the diversity of lower cryptogams (Algae, Fungi, Bacteria, and viruses), the collection and study of algae, fungi, bacteria from different natural sources, their identification up to generic level. After completion of the course the students will be familiar with various physiological aspects involved in the plant development, the role of enzymes in it and mechanism of photosynthesis, respiration, nitrogen and lipid metabolism. Identification of genus and species of locally available wild plants, preparation of botanical keys at generic level by locating key characters, knowledge of at least 10 medicinal plant species, the study of at least 20 locally available families of flowering plants and knowledge of secondary metabolites and its use in taxonomy, development of plant reproductive parts i.e. male, female gametophytes and fruits. Sterilization techniques for media as well as for explants and their culture, anther culture, pollen culture,

micropropagation, embryo rescue technique, somaclonal variation, isolation of plant protoplasts and their fusion techniques, tissue culture of important horticultural and medicinal plants etc. The students will also learn microbial isolation and pure culture techniques. The students will learn different aspects in Ecology, environmental problems and their mitigation rules along with different Environment laws.

Course curriculum

The Post-Graduate (M.Sc.) curricula in Botany is of two-year duration in choice based credit system (CBCS) with total of 88 Credit and 2000 marks. The system of examination is of semester pattern. There will be four semesters each consisting of five core/elective papers with 4 credit and 100 marks each along with two noncredit, value added courses one in 2nd and another in 3rd semester; one add-on course 4th semester. In first and second semester there will be 5 core papers including 4 theory and 1 practical paper. In third semester there will be one core theory and 1 practical along with one elective paper (interdisciplinary open for other department students) and 2 elective theory papers open for Botany students. In fourth semester there will be three core papers (1 core theory paper, one Seminar & Field Study/ Industrial Visit/Scientific Visit paper and one dissertation). Students have to present a subject relevant topic as seminar presentation in the department and submit a Field Study/ Industrial Visit/Scientific Visit report, which will be evaluated by the faculty members of the department and a dissertation/project work. Presentation of Seminar, carries 50 marks and Field Study/ Industrial Visit/Scientific Visit paper, carries 50 marks. For dissertation/project work, each student is required to work on a particular problem related to Botany/Biosciences with one of the faculty members of the Post Graduate department of Botany or from any reputed Universities/Institutes/Organizations to submit a thesis/dissertation with power point presentation, which carries 100 (75+25) marks (6 credits) to fulfill the Master's degree). In fourth Semester, there will be 2 elective theory papers open for Botany students. For all the theory papers 20 marks is for internal evaluation and 80 marks is for end term examination.

Core Research Areas

The faculty members of the department work on all current topics in Botany, ranging from Phycology, Microbiology, Ecology, Bioinformatics & Computational Biology, Molecular Biology, Biochemistry, etc.

Semester: I/II/III/IV - Credit: 88; Core 15; Elective: 05; Value added course: 02; Add on: 01

***CBCT (Inter Disciplinary Elective Papers)**

(# Students have to choose one of the following courses except 'BOTA-CT-300')

BOTA-CT-300: Economic Botany (Offered by Dept. of Botany)

BIOT-CT-300: Biotechnology in Human Welfare (Offered by Dept. of Biotechnology)

ENVS-CT-300: Population and Environmental Issues (Offered by Dept. of Environment Studies)

MARB-CT-300: Environmental Impact Assessment and Management plans (Offered by Dept. of Marine Science)

ZOOL-CT-300: Conservation Biology (Offered by Dept. of Zoology)

Value added course: BOTA- VAC-206; BOTA- VAC-305

Add On Course (AC): BOTA-AC-406: Cultural Heritage of South Odisha

Code Used: BOTA- Botany, C- Core, P- Practical, D- Dissertation, CT- Choice Based Credit Transfer), VAC- Value Added Course, AC- Add-on Course, NC- Non-Credit

*3rd semester students can opt for two elective courses BOTA E302 (A) or (B), BOTA E303 (A) or (B) and one CBCT course offered by other departments. Other department students can opt for BOTA CT300.

** 4th semester students can opt for two elective courses BOTA E403 (A) or (B), BOTA E404 (A) or (B)

(BOTA: Botany, C: Core, E: Elective; P: Practical, VAC: Value Added Course, AC: Add on course & D: Dissertation).

DETAILS OF SYLLABUS

SEMESTER: I

Semester: I Course No: BOTA C101

Course Name: Microbiology

Credits: 4

Core/Elective: Core

Course details

Chapter	Contents	Hours
Unit- I	History and development of Microbiology: History and scope of Microbiology, Microbial evolution, classification of microorganisms, five kingdom classification, three domain classification; modern approaches in microbial taxonomy, ribosomal RNA sequencing; Bergy's manual of bacterial classification, role of bacteria and archaea in human health, medicine, agriculture and industry.	12
Unit- II	Bacteria and Archaea: Cell structure; nutrition; reproduction; Bacterial genetics: conjugation, transduction and transformation, sex-duction, mapping genes by interrupted mating; plasmid; episome; microbial growth & methods of microbial growth measurements; bacterial toxin General features and pathogenicity of Mycoplasma, Rickettsia and Spirochetes.	12
Unit- III	Cyanobacteria: Classification, cell structure, nutrition, reproduction, cellular differentiation, akinetes and its function, heterocyst (heterocyte) and its function, cyanotoxin; role of cyanobacteria in human health, medicine, agriculture, bioenergy and industry. General characteristics and Evolutionary significance of prochlorophyceae,	12
Unit- IV	Virus: General properties; structure, purification, cultivation, principle of viral taxonomy, classification, one step growth experiment, Phage and its life cycle, RNA phages, DNA viruses, RNA viruses; virioids and prions; structure, transmission, and replication of plant virus (TMV) and animal viruses (HIV); Economic importance of virus	12
Total		48

Referred Text books:

1. Microbiology by Prescott, L. M., Harley, J. P. and Klen, D. A, Tata McGraw-Hill, New York.
2. Microbiology by Pelczar, Jr., M. J., Chan E.C.S. and Krieg, N. R, Tata McGraw-Hill, New Delhi.
3. General Microbiology by Stanier, R.Y., Ingraham, J.L., Wheelis, M.L., and Painter, P.R. The McMillan Press Ltd.
4. Brook Biology of Microorganisms by Madigan, M.T., Martinko, J.M. and Parker, J. Prentice-Hall.
5. Microbial Genetics by Maloy, S.R., Cronan, J.E.Jr., and Friefelder, D. Jones and Bartlett Publishers.
6. Phycology by R.E. Lee, Cambridge University Press (for Cyanobacteria)

Semester: I Course No: BOTA C102**Course Name: Lower Plant diversity and Paleobotany****Credits: 4****Core/Elective: Core****Course details**

Chapter	Contents	Hours
Unit- I	Algae: Distribution (terrestrial, freshwater, marine); thallus organization; cell structure; criteria for classification of algae; pigments, reserve food, flagella, reproduction (vegetative, asexual, sexual). Salient features of Glaucophyta, Rhodophyta, Euglenophyta, Phaeophyta Bacillariophyta, Xanthophyta, Chlorophyta and Charophyta; algal blooms and toxins; economic importance of algae; algae as biofertilizer, food, feed and uses in industry.	12
Unit- II	Fungi: General characters of fungi; recent trends in classification; phylogeny of fungi; cell ultra-structure, unicellular and multicellular organization; substrate relationship in fungi; nutrition, reproduction; heterothallism; heterokaryosis; parasexuality; general account of Mastigomycotina, Zygomycotina, Ascomycotina, Basidiomycotina, Deuteromycotina; Economic importance of Fungi i.e. medicine, food, industry, and disease, General account of lichen, Mycorrhizae and their economic importance.	12
Unit- III	Bryophyta: Classification; theories of origin (algal and pteridophytean), Phylogenetic relationships among Bryophytes; distribution, morphology, structure, reproduction and life history; general account of Marchantiales, Jungermaniales, Anthocerotales, Sphagnales, Funariales and Polytrichales; Ecological importance; Evolution of gametophytes and sporophytes in bryophytes. Pteridophyta: Morphology, anatomy and reproduction; classification; evolution of stele; heterospory and origin of seed habit. General account of Psilopsida, Lycopsida; Sphenopsida and Pteropsida.	12
Unit- IV	Gymnosperms: General characteristic features of Gymnosperms, Classification of Gymnosperms and their distribution in India. General account of Cycadales, Coniferales, Ephedrales, and Gnetales. Paleobotany: Geological time scale, origin and geological evidences; evolutionary time scale (eras, periods and epoch). Types of fossils, processes of fossilization, role of fossils in evolution. Brief account of fossil Pteridophytes and Gymnosperms. Cycadeoidales, Pentoxylales, Medullosales and Glosspteriodales.	12
Total		48

Referred Text books:

1. Phycology by R.E. Lee, Cambridge University Press
2. Algae by L.E. Graham and L. W. Wilcox Prentice Hall
3. Introductory Phycology by Kumar, H. D. (1988), East-West Press, New Delhi.
4. Bryophyta by B.R. Vasista, S. Chand Publication
5. Bryophyta by N. S, Parihar, Central Book Depot, Allahabad.
6. Gymnosperms by Bhatnagar, S. P. and Moitra, A., New Age International, New Delhi.
7. Biology and Morphology of Pteridophytes by Parihar, N. S., Central Book Depot, Allahabad.

8. Gymnosperms: Structure and Evolution by Chamberlin, C. J., Dover Publications, New York.
9. Introductory Mycology by Alexopoulos, C. J., Mims, C. W. and Blackwell, M., John Wiley, New York.
10. An Introduction to Mycology by Mehrotra, R. S. and Aneja, R. S., New Age International, New Delhi.

Semester: I Course No: BOTA C103

Course Name: Cell Biology and Evolution

Credits: 4

Core/Elective: Core

Course details

Chapter	Contents	Hours
Unit- I	Structural organization of the plant cell and their function: Structure and functions of cell wall, plasma membrane, ion carriers, channels and pumps, receptors, chloroplast, mitochondria, peroxisome, endoplasmic reticulum, ribosome, lysosome, vacuole, nuclear pore and nucleolus. Cell shape and motility: cytoskeleton organization, role of microtubules and microfilaments in flagella and other moments.	12
Unit- II	Cell cycle: Mitosis, meiosis, DNA synthesis in cell cycle, regulation of cell cycle: role of cyclins and cyclin-dependent kinases; cytokinesis and cell plate formation; cell surface receptors, G-protein coupled receptors, signal transduction pathways, secondary messengers, regulation of signaling pathways.	12
Unit- III	Structure and organization of eukaryotic chromosomes: Chromatin - heterochromatin and euchromatin, special types of chromosomes, chromosome morphology, karyotype, chromosome banding, sex chromosomes, sex determination in plants, dosage compensation, B-chromosomes, Chromosome organization, DNA packing, Nucleosome, Nuclear DNA content, C-value paradox, satellite-DNA, cot-curve, unique and repetitive DNA, Junk DNA and ENCODE project, <i>In situ</i> hybridization concept and techniques, FISH and GISH.	12
Unit- IV	Evolution: Lamarckism; Darwinism-concepts of variation, adaptation, struggle, fitness and natural selection. Neo-Darwinism, synthetic theory of evolution, genetic polymorphism, gene pool, gene frequency; Hardy-Weinberg Law, Origin of new genes and proteins; molecular evolution, epigenetics and adaptive evolution.	12
Total		48

Referred Text books:

1. Cell Biology by De-Robertis Saunders, Singapore.
2. Reproduction in eukaryotic cells, Prescott DM, Academic Press.
3. Developmental Biology, Gilbert SF, Sinauer Assoc. Inc.
4. Cell in Development and Inheritance, Wilson EB, McMillan, New York.
5. Molecular Biology of Cells, Alberts B et al.
6. Molecular Cell Biology, Lodisch et al.
7. Molecular Biology of steroid and Nuclear Hormone Receptor, Freedman LP, Birkhauser, Basel.
8. Buchanan, B. B., Grisse, W. and Jones, R. L. J., (2000). Biochemistry and molecular biology of plants. American Society of plant physiologists, Rockville, USA
9. The Cell: A molecular approach by Cooper G. M., ASM Press, Washington, D. C., USA.
10. Essentials of Molecular Biology by Malacinski, G. M and Feidfelder, D Ed. Jones and Bartel, London.
11. Gene IX or X by Lewine, B. Person-Prentice Hall, London.

Semester: I, Course No: BOTA C104**Course Name: Genetics and Molecular Biology****Credits: 4****Core/Elective: Core****Course details**

Chapter	Contents	Hours
Unit- I	Genetics: Mendelism and deviation of Mendelian ratios, epistasis, linkage and crossing over, sex-linked inheritance, three point test cross and chromosome mapping, Extra chromosomal inheritance, mitochondrial and chloroplast genome.	12
Unit- II	Cytogenetics: Structural chromosome aberrations: duplication, deficiency, inversion and translocations heterozygotes; Numerical chromosome aberrations: aneuploids: trisomics and monosomics; euploids: autopolyploids, allopolyploids, segmental allopolyploid, role polyploidy in speciation with reference to <i>Triticum</i> and <i>Brassica</i> .	12
Unit- III	Molecular genetics: Prokaryotic and eukaryotic DNA replication: DNA polymerases, replisome, replicon, primase, telomerase. RNA transcription: mRNA, tRNA, rRNA, siRNA, miRNA, RNAi, RNA polymerases, RNA-processing: RNA splicing, spliceosome, RNA editing. Deciphering genetic code. Protein translation, post-translational modifications, protein targeting. Regulation of gene expression in prokaryotes and eukaryotes; Fine structure of gene, cis-trans test.	12
Unit- IV	Mutagenesis, DNA damage and repair: Spontaneous and induced mutations, physical and chemical mutagens, molecular basis of mutations, transposable elements in prokaryotes and eukaryotes, mutations induced by transposons, site directed mutagenesis, DNA damage and repair mechanisms. Environmental mutagenesis and genetic toxicology	12
Total		48

Referred Text books:

1. Genetics: A Conceptual Approach by Pierce, B. A., W. H. Freeman, New York.
2. Principles of Genetics by Simmons, M.J., Snustad, D.P., Tamarin, R.H.
3. Molecular Biology of the Gene by J.D. Watson, N.H. Hopkins, J.W. Roberts, J.A. Steitz and A.M. Weiner, the Benjamin / Cummings Pub. Co. Inc., California.
4. Genomes by T.A. Brown.
5. Molecular Cell Biology by J. Darnell, H. Lodish and D. Baltimore, Scientific American Books Inc USA 1994.
6. Gene IX by Benjamin Lewin, Oxford University Press, U.K.
7. Molecular Biology of the Cell by B. Alberts, D. Bray, J. Lewis, M. Raff. K. Roberts, and J.D. Watson, Garland Publishing Inc., New York.
8. The Cell: A molecular approach by Cooper G. M., ASM Press, Washington, D. C., USA.

Semester: I, Course No: BOTA P105**Course Name: Practical****Credits: 4****Core/Elective: Core****Course details**

Chapter	Contents	Hours
Microbiology	1. Laboratory Protocol, general rules and regulations for laboratory safety. 2. Bacterial staining (simple staining, negative staining, Gram staining and acid-fast staining, spore and capsule staining) 3. Microbial pure culture techniques (Streak plate methods, Pour plate methods); sub-culturing techniques.	100

Lower plant diversity	4. Microscopic measurement of microorganisms (Micrometry). 5. Measurements cultural characteristics of microorganisms. 6. Measurement growth microorganism (microbial cells counting, CFU counting, spectrophotometric/colorimetric analysis etc.) 7. Collection, microscopic identification cyanobacteria, micro and macro algae, preparation permanent slides of caynobacteria, microalgae. Preservation, and preparation of herbarium macroalgae.	
Cell biology	8. Study of morphology and reproductive structures of fungi belonging to different classes through permanent microscopic preparations and preserved specimens. 9. Study of temporary & permanent preparation for microscope observation of external and internal features of vegetative and reproductive structure of important genera of Bryophytes. 10. Study of temporary and permanent preparation of vegetative and reproductive structure of Pteridophytes. 11. Study of temporary and permanent preparation of vegetative and reproductive structure of Gymnosperms and Fossils.	
Genetics and Molecular Biology	12. Squashing techniques for study of mitosis and meiosis in onion root tip and flower bud; Microscopic analysis of different stage cell division and microphotography. 13. Mitotic index of dividing cells of <i>Allium cepa</i> root tips. 14. Comparative karyotypic analysis of two species of a genus. 15. Isolation of plant DNA and quantification of extracted DNA by spectrophotometric method 16. Chromosome mapping through two and three point test cross	
Total		100

Referred books/manual/Monographs

1. Microbiology A Laboratory Manual by Cappuccion, J.G., and Sherman, N., Addison Wesley
2. Microbiological Applications (A Laboratory Manual in General Microbiology) by Benson, H.J., W.C.B., Wim C. Brown Publishers
3. Practical Botany, Vol. 2 by S.C. Santra, NCBA publication
4. Handbook of Microbial Technology by Yadav, A.K. and Mowade, S.M.
5. Methods in Plant ecology by S.B. Chapman, Wile and son publications
6. Algal culture techniques by Andersen
7. Manuals of Phycology by Smith

SEMESTER: II

Semester: II, Course No: BOTA C201

Course Name: Systematics of Angiosperms

Credits: 4

Core/Elective: Core

Chapter	Contents	Hours
Unit- I	Taxonomic Structure: Taxonomic hierarchy; Concept of species, genus and family, Plant Nomenclature: Salient features of International Code of Nomenclature (ICN) for Algae, Fungi and Plants: priority, effective and valid publications and author citation. Type concept, Taxonomic Tools: Field and Herbarium techniques; Floras and Botanic Gardens, Computer and Taxonomy.	12
Unit- II	Systems of Angiosperm Classification: Artificial, natural and phylogenetic systems, relative merits and demerits of major systems of	12

	classification (Bentham and Hooker, Engler and Prantle, Hutchinson and Takhtajan). Angiosperm Phylogeny groups (APG)	
Unit- III	Angiosperm Families: Floral structure and phylogenetic relationship among the taxa under the following orders: Liliflorales, Scitaminae, Orchidales, Ranales, Rosales, Tubiflorae, Malvales, Asterales and Rubiales.	12
Unit- IV	Taxonomic Evidences: Morphology, anatomy, palynology, embryology, cytology, phytochemistry and serology. Phylogenetic tree and Cladistics	12
Total		48

Referred Text books:

1. Principles of Angiosperms Taxonomy by Davis, P. H. and Heywood, V. H., Robert E. Kreiger, New York.
2. Current Concepts in Plant Taxonomy by Heywood, V. H. and Moore, D. M., Academic press, London.
3. Principles and Methods Plant Biosystematics by Solbrig, O. T., MacMillan, London.
4. Plant taxonomy and Biosystematics by Stace, C. A., Edward Arnold, London.
5. Diversity and Classification of Flowering Plants by Takhtajan, A. L. Columbia University Press, NY.
6. Contemporary Plant Systematics by Woodland, D. W. Prentice-Hall, New Jersey, USA

Semester: II, Course No: BOTA C202**Course Name: Plant Physiology and Metabolism****Credits: 4****Core/Elective: Core****Course details**

Chapter	Contents	Hours
Unit- I	Membrane transport and translocation of water and solutes: Plant water relation, mechanism of water transport through xylem, phloem loading and unloading, passive and active solute transport, membrane transport proteins. Photosynthesis: Light harvesting complex, structure and chemistry, Photolysis of water and Hill Reaction, Photo-phosphorylation, CO ₂ -fixation, C ₃ and C ₄ and CAM pathways, photorespiration.	12
Unit- II	Respiration: Glycolysis, Fermentation, TCA cycle, pentose phosphate pathways, mitochondrial electron transport and ATP synthesis, alternate oxidase, Glyoxylate Cycle. Lipid metabolism: fatty acid biosynthesis, synthesis of membrane lipids, storage lipids and their catabolism.	12
Unit- III	Nitrogen metabolism: Biological nitrogen fixation, asymbiotic and symbiotic nitrogen fixation, nodule formation, nod and <i>nif</i> genes, their regulation and function, mechanism of nitrate uptake and reduction, ammonium transport and assimilation. Sensory Biology: Structure, function and mechanisms of action of phytochromes, cryptochromes and phototropins, stomatal physiology; Phytohormones: Plant growth regulators, structure and function, ethylene, abscisic acid, brassinosteroids, polyamines, jasmonic acid.	12
Unit- IV	Stress Physiology: Plant responses to biotic and abiotic stress, mechanisms of biotic and abiotic stress tolerance, water deficit and drought resistance, salinity stress, metal toxicity, freezing and heat stress, oxidative stress. Oxidative metabolism: reactive oxygen species (ROS), antioxidants, antioxidant enzymes: catalase, peroxidases, superoxide dismutase, glutathione transferase, glutathione reductase, <i>Halliwell-Asada cycle</i> .	12

	Physiology of aging and senescence, influence of hormones and environmental factors on senescence. Programmed cell death.	
Total		50

Referred Text books:

1. Plant Physiology by Taiz & Zeiger, Sinauer Publications
2. Biochemistry and Molecular Biology of Plants by Buchachnanan, B. B., Grisse, W. and Jones, R. L. J., American Society of Plant Physiologists, Rockville, USA.
3. Plant Physiology by Devlin, R. N. and Witham, F. H., CBS Publishers, Delhi.
4. Plant Physiology by Salisbury, F. B. and Ross, C. W., Wordworth Publication California, USA

Semester: II, Course No: BOTA C203**Course Name: Biochemistry and Biostatistics****Credits: 4****Core/Elective: Core****Course details**

Chapter	Contents	Hours
Unit- I	Basics of Biochemistry: Structure of atoms, molecules, chemical bonds, stabilizing interactions (Van der Waals, electrostatic, hydrogen bonding and hydrophobic interactions). Principle of biophysical chemistry and bioenergetics: pH, buffer, reaction kinetics, thermodynamics, colligative properties, couples reactions, group transfer, biological energy transfer.	12
Unit- II	Biomolecules: Composition, structure, and function of biomolecules (carbohydrates, lipids, proteins, nucleic acids and vitamins). Confirmation and stability of protein (Ramachandra plot, secondary, tertiary and quaternary structure; domains, motif, and fold). Confirmation and stability of nucleic acids (A-, B-, Z- DNA, RNA); phenols and terpenes.	12
Unit- III	Plant enzymes and coenzymes: Nomenclature and classification of enzymes and coenzymes: Distribution of enzymes in plant, structure and function of Isozymes. Enzyme kinetics, mechanism of enzyme action and its regulation. Factors affecting enzyme action. Antioxidants: Structure and functions of ascorbic acid, glutathione, tocopherol, carotenoids etc.	12
Unit- IV	Biostatistics: Frequency distribution, cumulative and relative frequency. Measurement of central tendency and dispersion, mean, median and mode, mean deviations, variance and standard deviation, coefficient of variation, errors. Analysis of variance (ANOVA). Comparison of means: Students 't' test and paired 't' test. Chi-square (X ²) test, 2 x 2 contingency table and association analysis as applied to biological experimental data. Simple correlation and linear regression analysis.	12
Total		48

Referred Text books:

1. Lehninger Principle of Biochemistry by Nelson and Cox
2. Advanced Biochemistry by Voet and Voet
3. Principle of Biochemistry by Stryer

4. Biochemistry by Mathews, C. K., Van Holde, K. E. and Ahern, K. G., Addison-Wesley Publishing Company, San Francisco, USA.
5. Genes VH, B. Lewin, Oxford University Press.
6. Proteins – Structure and Molecular Properties, TE Creighton, WH Freeman and Company.
7. Introduction to Protein Structure, C. Branden and J. Tooze, Garland Publishing, New
8. Fundamentals of Biostatistics by Veer Bala Rastogi
9. Fundamentals of Biostatistics by Bernard Roser

Semester: II Course No: BOTA C204

Course Name: Ecology and Environment

Credits: 4

Core/Elective: Core

Course details

Chapter	Contents	Hours
Unit- I	Ecosystem organization & function: Biotic and abiotic components, trophic level, food chain, food web, Aquatic ecosystems, Marine ecosystems, Wetland ecosystems, Grassland ecosystems, Forest ecosystems. Ecological adaptations, Energy flow in the ecosystem, primary production (methods of measurement), decomposition, energy dynamics, ecological efficiencies, concept of energy subsidy, universal energy flow, The Gaia hypothesis, Biogeochemical cycle.	14
Unit- II	Population ecology: Population interactions (population density, natality, mortality, population age structure, carrying capacity, Community ecology: Ecological communities and ecosystems, structural analysis of communities, inter- and intra-specific competitions, Mutualism and commensalism, predation, parasitism, amensalism, competition and coexistence, Habitat and ecological niche.	12
Unit- III	Ecological regulation: System studies, Chemical transformations, Biochemical transformations, ecological succession, Mechanism of ecological succession and characters of succession.	10
Unit- IV	Environmental Pollution: Concept of pollution, air pollution, water pollution, terrestrial/soil pollution, noise pollution, and radiation pollution. Source of pollutants: natural and anthropogenic pollutants; Global warming and climate change; Greenhouse gases (GHG), Ozone layer depletion, consequences of climate change: smog, acid rain etc. Environmental Pollution and Legislative solution: Pollution Control Board; natural and men made disasters and disaster management; Environmental education and awareness, environmental audit, environmental management, environmental crisis, environmental ethics.	14
Total		50

Chapter	Contents	Hours
Plant Systematics	1. Description and identification of Angiosperms at family, genus and species levels using Floras.	100
Plant Physiology Biochemistry	2. Herbarium techniques.	
	3. Determination of Transpiration and Absorption ratios.	
	4. Measurement of rate of photosynthesis	
	5. Preparation of Buffers.	
	6. Quantitative estimation of Protein (Lowry methods/Bradford Method), Sugars (Anthrone Methods), Lipids (Bligh and Dryer Method).	
Ecology and Environment	7. Quantitative estimation of Amino acids (Ninhydrine methods)	
	8. Spectrophotometric analysis of different enzymes (CAT, APX, GR, SOD)	
	9. Estimation of pigments (chlorophylls and carotenoids) from plant and algal materials.	
	10. Estimation Dissolved oxygen (DO) water samples by Winkler's method	
	11. Physico-chemical analysis of water and soil (pH, chloride, phosphate, nitrogen, potassium)	
	12. Determination of primary productivity of water samples.	
	13. Determination of minimum size and number of quadrants required for reliable estimates of biomass in grassland	
Biostatistics	14. Determination of frequency, density of a species of a grassland community.	
	15. Calculation of Important Value Index (IVI) of grassland ecosystem.	
	16. Measurement of Central Tendency	
	17. Measurement of dispersion	
	18. Students's T test	
	19. X ² (chi-square) distribution

Referred practical books/manuals

- Biochemical Methods by Pingoud, Urbanke, Hoggett and Jeltsch, Willey-VCH
- Experimental biochemistry by Switze, R.L. and Garrity, L.F., Freeman and Company, New York
- Analytical Biochemistry and separation Techniques by Palanivelu, P
- Biochemical calculations, by Segel
- Phytochemicals Techniques by N. Raaman
- Phytochemicals methods by Harborne, J.G, Springer

Semester: II, Course No: BOTA VAC206**Add on Course Name: Organic Farming****Credits: NC****Core/Elective: Non Credit****Course details**

Chapter	Contents	Hours
Unit- I	Introduction to Organic Farming: Introduction; Need of Organic Farming; Benefits of Organic Farming; Social aspects of Organic Farming; Market aspects of Organic Farming	08

Unit- II	Organic Fertilizers: Need of Organic Fertilizer; Benefits of Organic Fertilizer; Preparation of Organic Fertilizer; Demonstration & land preparation. Plant Nutrients: Name of plant Nutrients; Functions of Nutrients in plant growth and Development Sources of nutrients for Organic Agriculture: Organic Manure: Rural compost, City compost, Oil cakes, Animal wastes, Green Manure with Leguminous crops in crop rotation. In-situ incorporation of crop residues	08
Unit- III	Bio fertilizers and their method of use: Need and Benefits of Microorganism, Management of Microorganism, mechanism of action in increasing soil fertility Preparation of vermin compost: Pit construction; Raw materials; Availability of specific species of earth worm; Method of preparation; Quality improvement of finished vermicompost	08
Unit- IV	Plant Protection Measures: Integrated pest & disease management techniques, Organic pesticides, bio-pesticides. Inorganic pesticides, disadvantages of their use. Seed, seedling and soil Treatment measures. Feasibility of complete dependence on organic sources. Good Harvesting Practices; Storage; Transportation; Supply Chain.	08
Total		32

Referred Text books:

1. Basics of Organic Farming by Bansal and Mamta, CBS publication
2. A text book of Modern Organic Farming
3. Principles of Organic Farming: Textbook (By P. L. Maliwal)

SEMESTER: III**Semester: III, Course No: BOTA C301****Course Name: Plant Embryology and Anatomy****Credits: 4****Core/Elective: Elective**

Chapter	Contents	Hours
Unit- I	Male and female gametophyte: Structure of anthers, microsporogenesis, role of tapetum, pollen development and gene expression; male sterility, sperm dimorphism and hybrid seed production, pollen germination, pollen tube growth and guidance, pollen storage, pollen allergy, pollen embryos. Female gametophyte: Ovule development, megasporogenesis; organization of the embryo sac, structure of the embryo sac cell.	12
Unit- II	Pollination, Pollen-pistil interaction and fertilization: Floral characteristics, pollination mechanisms and vectors, breeding system; commercial considerations, structure of the pistil, pollen stigma interactions, sporophytic and gametophytic self-incompatibility (cytological, biochemical and molecular aspects), double fertilization, <i>in vitro</i> fertilization.	12
Unit- III	Seed development and fruit ripening: Endosperm development during early, maturation and desiccation stages, embryogenesis, ultra-structure; cell lineages during late embryo development; storage proteins of endosperm and embryo; polyembryony, apomixis; embryo culture, dynamics of fruit growth and ripening; Latent life-dormancy; Importance and types of dormancy, seed dormancy, overcoming seed dormancy, bud dormancy.	12

Unit- IV	Plant Anatomy: Tissue and tissue system; Meristematic tissue, distribution of mechanical tissues, apical meristem, Root-shoot transition, shoot-root development, leaf development and phyllotaxy, transition to flowering. Nature and need of secondary growth, Normal secondary growth in dicot stem, Anomalous secondary growth in dicot and monocot stem (adaptive and non-adaptive),	12
Total		48

Course details

Referred Text books:

1. Seed: physiology of Development and Germination by Bewley, J. D. and Black, M. Plenum, New York.
2. The Embryology of Angiosperms by Bhojwani, S. S. and Bhatnagar, S. P., Vikas Publishing House, New Delhi.
3. Molecular Embryology of Flowering Plant by Raghavan, V. Cambridge University Press, Cambridge.
4. Developmental Biology of Flowering Plants by Raghavan, V., Springer-Verlag, New York.
5. Plant Anatomy by B.P. Pandey. S. Chand & Co. Ltd.
6. Anatomy of Angiosperms by B.K. Mishra and N. Dash, Kalyani Publishers.

Semester: III, Course No: BOTA E302(A)

Course Name: Molecular Plant Pathology and Immunology

Credits: 4

Core/Elective: Elective

Chapter	Contents	Hours
Unit- I	Phytopathology: Plant disease symptoms, modes of infection and dissemination; altered metabolism of plants under biotic and abiotic stresses; host-parasite relationship, disease triangle, disease cycle and stages of disease development, molecular mechanism of pathogenesis, recognition phenomenon, penetration and invasion.	12
Unit- II	Host resistance: Primary disease determinant; enzymes and toxins in relation to plant diseases; host defense mechanism, molecular mechanism of resistance; phytoalexins, PR proteins, antiviral proteins, SAR, HR and active oxygen radicals	12
Unit- III	Immune system: Innate and adaptive immune system Cells and molecules involved in innate and adaptive immunity, antigens, antigenicity and immunogenicity. B and T cell epitopes, structure and function of antibody molecules, generation of antibody diversity, monoclonal antibodies, antibody engineering, antigen-antibody interactions	12
Unit- IV	Immune response: MHC molecules, antigen processing and presentation, activation and differentiation of B and T cells, B and T cell receptors, humoral and cell-mediated immune responses, primary and secondary immune modulation, complement system.	12
Total		48

Course details

Referred Text books:

1. Plant Pathology by Mehrotra, R. S. and Aggarwal, A., Mc Graw Hill Education.
2. Kuby Immunology, 4th edition, R.A. Goldsby, Thomas J. Kindt, Barbara A. Osborne (Freeman).
3. Immunology, A Short Course, 4th Edition, Eli Benjamin, Richard Coico, Geoffrey
4. Sunshine (Wiley-Liss).

5. Fundamentals of Immunology, William Paul.
6. Ivan Roitt: Roitt's Essentials of Immunology

Semester: II, Course No: BOTA E302(B)

Course Name: Natural Resources and Utilization

Credits: 4

Core/Elective: Core

Course details

Chapter	Contents	Hours
Unit- I	Introduction to Natural Resources: Concept of natural resources, types and classification. Factors causing resource accessibility, statistical distribution and function. Ecological, social and economic dimension of resource management.	12
Unit- II	Natural resources and management: Conservation of natural resources, Non-renewable energy resources, Alternative sources of energy, new concepts for alternative energy. Renewable energy resources: Water resources, soil resources, Soil conservation and management. Water resources and conservation: rain water harvesting, water shed management, uses of water, Forest as a renewable resource, deforestation, afforestation, conservation, social forestry, wild-life conservation	12
Unit- III	World centre of primary diversity of domesticated plants: Basic concepts, origin of agriculture and plant introduction. Origin, evolution, botany, cultivation and uses of (i) Food crops, (ii) fibre crops, (iii) medicinal and aromatic plants, and (iv) vegetable and oil-yielding crops with special reference to local plants. Plants, plant parts and plant products used in homeopathy medicines, Plants, plant parts and plant products used in ayurvedic medicines, Important timber-yielding plants, Important poisonous plants of India. Concept of phytogeography: Climate and Vegetation pattern of the World; Endemism, Floristic regions of India; vegetational pattern of India.	14
Unit- IV	In situ conservation: International efforts and Indian initiatives; protected areas in India – Sanctuaries, national parks, biosphere reserves, wetlands and mangroves for conservation of wild biodiversity. Ex situ conservation: Principles and practices; botanical gardens, field gene banks, seed banks, cryobanks, general account of the activities of Botanical Survey of India (BSI), National Bureau of Plant Genetic Resources (NBPGR). Principles of conservation; extinction; environmental status of plants based on IUCN (Now World Conservation Union). Salient features of Biodiversity Act and rules.	12
Total		48

Referred Text books:

1. An Advance Text book and Biodiversity: Principles and Practice by K.V. Krishnamurthy, Oxford & IBH publication, New Delhi.
2. Plants, Genes and Agriculture by Conway, G. and Barbier, E., Jones and Bartlett, Boston, USA.
3. Tropical Botanical Gardens Their role in Conservation and Development by Heywood, V. H. and Wyse Jackson, P. S., Academic press, San Diego, USA.
4. Understanding Biodiversity: Life sustainability and Equity by Kothari, A, Orient Longman, New York.
5. Biodiversity and its Conservation in India by Negi, S. S. Indus Publishing Company, New Delhi.
6. Evolution of Crop Plants by Simmonds, N. W., Longman, New York.

Semester: IV, Course No: BOTA E303(A)**Course Name: Bioinformatics and Biostatistics****Credits: 4****Core/Elective: Elective****Course details**

Chapter	Contents	Hours
Unit- I	Introductory Bioinformatics: Introduction to Bioinformatics, Introduction to data structures and database concepts, Biological sequence analysis and information retrieval, pair wise and multiple sequence alignment: BLAST, FASTA, Phylogenetic analysis.	12
Unit- II	Basics of Molecular Modelling: Introduction to Molecular Modelling and its applications. Biomolecular modelling problems: protein folding, protein misfolding. Basic concepts of quantum mechanics, <i>ab initio</i> structure prediction. Molecular mechanisms, energy calculations, Bond stretch, Angle bending, torsional terms, Electrostatic interaction- van der Waals interactions. Molecular modeling in drug discovery.	12
Unit- III	Structure Based Drug Designing: Structure based drug designing: 3D pharmacophores, molecular docking, De novo Ligand design, 3D data base searching and virtual screening, Mechanism of drug absorption, distribution, metabolism and excretion: ADME process; Drug toxicity evaluation, Pharmacokinetics.	12
Unit- IV	Molecular Dynamics and Simulations: Introduction to molecular dynamics and simulations; Monte-carlo simulation of biomolecules. Comparative modelling of protein: by homology modelling, validation of protein models –Ramachandran plot, threading and <i>ab initio</i> modelling.	12
Total		48

Referred Text books:

1. Molecular Modelling: Principles & Applications. By Andrew R. Leach, Pearson (Prentice Hall) 2nd Edition 2001.
2. Bioinformatics: A practical guide to the analysis of genes and proteins. By AD Baxevanis and BFF Ouellette (Wiley-Liss) 3rd Edition 2005.
3. Guidebook on Molecular Modeling in Drug Design- N. Claude Cohen, 1996. Elsevier
4. Molecular Modeling Basics- Jan H. Jensen, 2010. CRC Press.
5. Computational Chemistry and Molecular Modeling, Principles and Applications- K. I. Ramachandran, G. Deepa, K. Namboori, 2008
6. Textbook of Drug Design and Discovery, 5th Edition- Kristian Stromgaard, Povl Krogsgaard-Larsen, Ulf Madsen, 2016. CRC Press.

Semester: IV, Course No: BOTA E303(B)**Course Name: Environmental Biotechnology and Waste management****Credits: 4****Core/Elective: Elective****Course details**

Chapter	Contents	Hours
Unit- I	Aquatic toxicity assessment: concept of toxicity; mechanism of toxicant action; dose, effect and response; analysis of response curves; statistical doses of toxicants; Selection of test batteries, media, apparatus and facilities, liquid media and sediment toxicity assessment, microtox acute toxicity test.	12
Unit- II	Bioaccumulation: Concept and measurement, food chain and lipophilicity approach, quantitative structure activity relationship, kinetics of uptake and retention, factors affecting bioaccumulation. Bioaccumulation of metals: metal accumulation by flora and fauna; biosorption, phytofiltration, phytochelation and phytoextraction; role of metalphores	12

Unit- III	Biodegradation of organic pollutants: Microbial processes for degradation; measurement of biodegradability; aerobic and anaerobic degradation of carbohydrates, proteins and lipids, aliphatic hydrocarbons, aromatic hydrocarbons, degradation of halogenated organics, co-metabolic degradation, degradative capacity of fungi	12
Unit- IV	Fate of pesticides in the environment: Fundamental reaction of pesticide metabolism; microbial transformation of pesticides-oxidations, decarboxylation, dealkylation, halogen reaction, aromatic ring cleavage, hydrolysis and nitrate reduction, waste management.	12
Total		48

Referred Text books:

1. Ecology and Field Biology by Smith, R. L. Harper Collins, New York.
2. Ecology by Subrahmanyam, N. S. and Sambamurty, A. V. S. S. New Delhi

1.

Semester: III, Course No: BOTA CT300**Course Name: Economic Botany****Credits: 4****Core/Elective: Interdisciplinary**

Course details		
Chapter	Contents	Hours
Unit- I	Origin, history, domestication, botany, cultivation, production and use of: Cereals: Wheat, rice, maize, sorghum, pearl millet and minor millets. Pulses: Pigeon pea, chickpea, black gram, green gram, cowpea, soyabean, pea, lentil, horsegram, lab-lab bean.	12
Unit- II	Origin, distribution, cultivation, production and utilization of economic plants of following groups such as Plant of agro-forestry importance: Teak, Sal Acacia, Sesbania, Neem etc. Fibres: cotton, silk cotton, jute, sunnhemp. Oilseeds: Groundnut, sesame, castor, rape seed, mustard, sunflower, safflower, niger, oil palm, coconut and linseed.	12
Unit- III	Origin, distribution, classification, production and utilization of Fruits: mango, banana, citrus, guava, grapes and other indigenous fruits; apple, plum, pear, peach, cashewnut and walnut; Vegetables: tomato, brinjal, okra, cucumber, cole crops, gourds etc.	12
Unit- IV	Important medicinal and aromatic plants: Sarpagandha, Belladonna, Cinchona, Nux-Vomica, Vinca, Mentha and Glycirriza, Plantago etc.; Narcotics: Cannabis, Datura, Gloriosa, Pyrethrum and opium. Important Spices and condiments Ginger, Garlic, Cinnamon, Cardamom, Cumin, Foeniculum etc.	12
Total		48

Referred Text books:

1. Economic Botany by B.P. Pandey. S. Chand & Co. Ltd.
2. Economic Botany: S. L. Kochhar, Cambridge University Press
3. Economic Botany- Principle & Practices: G.E. Wickens, Kluwer Academic Publishers
4. Economic Botany & Ethnobotany: AfroZAlam, Willey

Semester: III, Course No: BOTA P304**Course Name: Practical****Credits: 4****Core/Elective: Core****Course details**

Chapter	Contents	Hours
Plant Embryology and Anatomy	<ol style="list-style-type: none"> 1. Microscopic observation various microsporangium (T.S & L.S.), Microspore tetrad, Pollen structure 2. Pollen counting and viability; staining of pollen tube 3. Microscopic study of ovules (T.S. & L.S.), Ovaries (T.S. & L.S.), structure of embryo sac organisation, types of endosperm etc. 4. Microscopic observation of Primary and Secretory tissue systems, Ecological anatomy, wood anatomy, preparation of permanent slides. 5. Colorimetry & Spectrophotometry 6. Determination of Absorption maxima of Dyes and verification of Beer-lambert's Law. 7. Centrifugation 8. Pair wise and multiple sequence alignment by using EMBL-EBI and/or ClustalW2 tools. 9. Phylogenetic analysis of proteins and genes using PHYLIP and /or Phylogenetic analysis using parsimony (PAUP) or any other analytical tools. 10. Protein Structure visualization and Homology modelling of proteins through PyMol, VMD and Swiss-PDBV. 11. Docking of small molecules to protein binding sites by AutoDock-Vina and MGL Tools or protein-protein docking through online modes. 12. Protein structure predictions via online servers like I-TASSER, Phyre2, QUARK, PredictProtein. 13. Molecular Dynamics simulation of small protein and water complex by AMBER/GROMACS. 14. ELISA for quantitative detection of plant pathogen 15. Immunodiagnostics (demonstration using commercial kits). 16. Preparation of a short list of ten most important sources of firewood and timber of the locality. Give their local names, scientific names and families to which they belong. Mention their characters. 17. Study of biodiversity and important flora of Odisha and India through field trips. 	100

Referred practical books/ manuals/monographs

1. A Practical Guide for Basic Bioinformatics and Biostatistics by Pallavi Pandey & Pooja Tiwari. Notion Press; First edition (2017), ISBN- 13: 978-1946822260.
2. Introductory Practical Biostatistics by Misra, B.N. and M.K. Misra
3. Practical Biochemistry: Principles and Techniques by Wilson and Walker
4. Plant reproduction by T. Pullaiah, K. Lakshminarayana, B. Hanumanta Rao
5. Udbhida Sangraha (In Odia) by M.K. Misra
6. Flora of Odisha by Saxena, H.o & M. Brahmam

Semester: III, Course No: BOTA VAC305**Add on Course Name: Nursery and Horticulture Techniques****Credits: NC****Core/Elective: Non Credit****Course details**

Chapter	Contents	Hours
Unit- I	Introduction to Nursery: Plant nursery: Definition, importance; Basic facilities for a nursery; layout and components of a good nursery. Nursery beds, types, their merits and demerits; precautions to be taken during preparation. Brief account of growing media; nursery tools and implements. Containers for plant nursery, Brief account of plant propagation structures.	08
Unit- II	Introduction to Horticulture: Horticulture: Definition, importance of horticulture in terms of economy, production, employment generation, environmental protection and human resource development. Fruit and vegetable zones of India and Odisha. Export scenario and scope for Horticulture in India. Classification of horticultural crops based on soil and climatic requirements	08
Unit- III	Introduction to Vegetable crops: Importance of vegetable cultivation in India and Odisha. Classification and Nutritive value of vegetables Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of following crops: Cultivation of (a) Brinjal (b) Tomato (c) Capsicum (d) Spinach (e) Coriander and (f) Mentha	08
Unit- IV	Introduction to Fruit crops: Importance of fruit growing in India and Odisha. Nutritive value of fruits. Origin, history, distribution, area and production, uses and composition, varieties, soil and climatic requirements, propagation, planting, training and pruning, manuring and fertilizer application, irrigation, intercropping, harvesting and yield, diseases and pests of the following tropical fruit crops: (a) Mango (b) Guava and (c) Papaya	08
Total		32

Referred Text books:

1. Nursery Management of Fruit Crops in India
2. Plant Propagation and Nursery Management

SEMESTER: IV**Semester: IV, Course No: BOTA C401****Course Name: Advanced Plant Biotechnology****Credits: 4****Core/Elective: Elective****Course details**

Chapter	Contents	Hours
Unit- I	Plant nutrition, plant cell and tissue culture: General introduction, history, scope, concept of cellular differentiation, totipotency. Plant micro and macronutrients, vitamins and growth hormones (auxins, gibberellins,	12

	cytokinins): physiological effects and mechanism of action, Media for plant tissue culture. Fundamental aspects of morphogenesis, micropropagation techniques, organogenesis somatic embryogenesis, androgenesis, gynogenesis and adaptive embryogenesis.	
Unit- II	Protoplasm culture: Somatic hybridization, protoplast isolation, fusion and culture, hybrid selection and regeneration. Possibilities, achievements and limitations of protoplasm research. Applications of plant tissue culture: clonal propagation, artificial seed production of hybrids, somaclones, production of secondary metabolites/natural products, cryopreservation and germplasm storage.	12
Unit- III	Plant genomics: Introduction to plant genomics, functional genomics, transcriptomics and proteomics, comparative genomics, organelle genomes (Mitochondria and Chloroplast). Studying genomes: shotgun approach, clone contig approach, chromosome walking and jumping, c-DNA, genome and gene libraries. Analysis of genome through application of DNA fingerprinting techniques: RFLP, RAPD, AFLP, SSR, SNP, DNA micro array. Expressed sequence tags (ESTs).	12
Unit- IV	Recombinant DNA, Transgenic and genome editing technologies: Methods of r-DNA technology and genetic manipulation; restriction endonucleases, vectors: plasmid, cosmid, BAC, YAC, <i>Agrobacterium</i> - the natural genetic engineer of Ti and Ri plasmid, mechanism T-DNA transfer to plant; Insect-, pathogen- and herbicide-resistant plants, stress tolerant plant; Genome and gene editing (CRISPR Cas-9) technologies for plant improvement. Regulatory, biosafety and ethical issues relating to transgenic and gene-editing.	12
Total		48

Referred Text books:

1. Molecular Biotechnology: Principles and Applications of Recombinant DNA by Glick, B. R. and Pasternak, ASM Press, Washington, D. C., USA.
2. Plants from Test Tube: An Introduction to Micropropagation by Kyte, L. and Kleyn, J.3rd Ed. Timber press, Portland, USA.
3. Plant Cell and Tissue Culture Vol VI by Pollard, W. J. and Walker, Humana press Clifton, USA.
4. Gene Cloning and DNA Analysis by Brown T. A. Blackwell Science, London.
5. Biotechnology and Plant Genetic Resources by Callow, J. A., Ford-Lloyed, B. V. and Newbury, H. J., Conservation and Use, CAB International, Oxon UK
Practical Applications of Plant Molecular Biology by Henry, R. J., Chapman & Hall, London, UK
Proteomics in Functional Genomics by Jolles, O. and Jornvall, H. (eds). Birkhauser Verlag, Basel, Switzerland.

Semester: III, Course No: BOTA C402**Course Name: Seminar and Field Study//Scientific Visit****Credits: 4****Core/Elective: Elective****Course details**

Chapter	Contents	Hours
Seminar Presentation and Field Study	The seminar presentation carries 50 marks and field study report also carries 50 marks. Students have to present one seminar in 3 rd semester. The seminar presentation will be evaluated by the department staff members. Students have to submit a detailed field study/scientific visit/field survey report through the guide/ supervisor. This field study report will be evaluated by an external member and	

	the department staff members. Students have to submit their field study's report within one week, after the completion of 3 rd semester end term examinations.	
Total		

Semester: IV, Course No: BOTA E403 (A)

Course Name: Microbial and Molecular Bio-techniques

Credits: 4

Core/Elective: Core

Course details

Chapter	Contents	Hours
Unit- I	Techniques of microbial culture: Preparation of solid and liquid media for algae, fungi and bacteria, pure culture isolation, maintenance and storage of microbes, culture characteristics, fixation and staining, cytophotometry and flow cytometry	12
Unit- II	Chromatographic techniques: Principles of chromatography (Adsorption and Partition chromatography), Planar chromatography (Paper and Thin-layer chromatography), Column chromatography (Gas chromatography, Gel exclusion/permeation chromatography, Ion exchange chromatography, Affinity chromatography, HPLC)	12
Unit- III	Molecular Techniques: Sequencing of Proteins and nucleic acids; Southern, Northern and Southern and Western blotting techniques; Methods for measuring nucleic acid and protein interactions. Polymerase chain reaction (PCR), RT-PCR.	12
Unit- IV	Electrophoretic techniques: General principles, support media, electrophoresis of proteins (SDS-PAGE, native gels, gradient gels, isoelectric focusing gels and two dimensional gels), electrophoresis of nucleic acids (Agarose, pulse-field and sequencing gels).	12
Total		48

Semester: IV, Course No: BOTA D405**Course Name: Dissertation****Credits: 4****Core/Elective: Core****Course details****DISSERTATION/PROJECT WORK**

Each student is required to carry out a project work on a particular problem related to Botany/Biosciences with one of the faculty members of the P.G. department of Botany or from other department of Berhampur University or from any reputed Universities/Institutes/Organizations duly approved by the Head of the Department to fulfill the Master's degree. Students in advance may contact the respective researchers/scientists from around the country to carry out the work for the project work much before the start of the 4th Semester (beginning/mid of the 3rd semester) to avail sufficient time for the planning and execution of the work.

Dissertation carries 200 marks. The dissertation will be evaluated jointly by both internal (supervisor) and external examiners for 150 marks. Seminar presentation carries 50 marks. The seminar presentation will be evaluated by the board of examiners consisting of the department faculty members and an external examiner from outside the University duly approved by the authority. The student has to submit their dissertation before the commencement of the practical examination (Paper No: BOTA P403) for evaluation and the dissertation must be certified with Turnitin for Plagiarism/similarity index certificate, signed by the Internal (supervisor) and the candidate. The UGC-2019 plagiarism rules are recommended by Berhampur University 2019-2020 prior to acceptance of M.Sc. dissertation for evaluation.

Format of M.Sc. Dissertation:

1. Title Page
2. Declaration certificate from the Candidate
3. Certificate from the supervisor
4. Plagiarism certificate, signed by supervisor and the candidate
5. Abstract/summary
6. Materials and Methods
7. Results
8. Discussion
9. Conclusion
10. References

Semester: IV, Course No: VAC**Course Name: Cultural Heritage of Ganjam****Credits: NC****Core/Elective: Non Credit****Course details**

Chapter	Contents	Hours
Unit- I	Kabi Samrat Upendra Bhanja: Life and Literary works	08
Unit- II	Other Literatures of Ganjam	08
Unit- III	Cultural Heritage of Ganjam	08
Unit- IV	Folk Tradition of Ganjam	08
Total		32

CBCT papers is interdisciplinary

Botany students can choose any of the under-mentioned courses offered by other departments of BU

Semester: III, Course No: BIOT CT-300

Course Name: Biotechnology in Human Welfare

Credits: 4

Core/Elective: Interdisciplinary

Chapter	Contents	Hours
Unit- I Basic Concepts of Biotechnology	Basic Concepts of Biotechnology and its applications, Recombinant DNA technology; gene cloning, human genome project, Tools of Bioinformatics.	10
Unit- II Agricultural and Environmental Biotechnology:	Application in Breeding, Nitrogen fixation, Transfer of pest resistance genes to plants, Interaction between plants and microbes, Qualitative improvement of livestock. Crop plant genome project. Chlorinated and non-chlorinated organ pollutant degradation; degradation of hydrocarbons and agricultural wastes, stress management, development of biodegradable polymers	10
Unit- III Medical and Pharmaceutical Biotechnology	Development of therapeutic agents, recombinant live vaccines, gene therapy, Diagnostics; Principle of DNA fingerprinting, Stem cell Biology, Ethical issues in Biotechnology research	10
Unit- IV Industrial Biotechnology	Introduction to bioprocess technology. Range of bioprocess technology and its chronological development. Basic principle of fermentation technology. Types of microbial culture and its growth kinetics– Batch, Fed batch and Continuous culture.	10
Total		40

Referred Text books:

1. John E. Smith. Biotechnology (2009) 5th Edition, Cambridge University Press.
2. Ignacimuthu Biotechnology: An Introduction (2012) 2nd Edition, Narosa Publishing House Ltd., India

Semester: III, Course No: ENVS CT-300

Course Name: Population and Environmental Issues

Credits: 4

Core/Elective: Interdisciplinary

Chapter	Contents	Hours
Unit 1: Demographic Overview	Introduction, History of human population growth, The demographic transition: India and World; Projections of population growth, Effects of human population growth, Unsustainable lifestyle – increased consumerism	12
Unit-2:	Energy Crisis: Background, Possible causes (Energy demand and consumption, Production capacity and dependence on imports);	12

Energy Crisis	Ecologically friendly alternatives and Possible Measures	
Unit-3: Environmental Contamination	Ambient Air pollution, Indoor air pollution and Health Impacts, Surface water pollution, Ground water pollution and Health Impacts, Solid Waste Pollution and Sustainable Solid Waste Management; Hazardous waste pollution, Radioactive waste, Electronic waste and Biomedical waste	12
Unit-4: Ecological Footprints and Carrying Capacity	Ecological footprints: Concepts, perspectives, carbon footprint, water footprint, Overshoot of ecological footprint and biocapacity of planet Earth, Resources Depletion.	12
Total		48

Referred Text Books

1. Cunningham WP and Cunningham MA (2002). Principles of Environmental Science: Inquiry and Applications. McGrawHill Publications, New Delhi, 418 pp.
2. Johri R (2009). E-Waste: Implications, regulations, and management in India and current global best practices. TERI Press, New Delhi. 330 pp.
3. McKillop A and Newman S (2005). The Final Energy Crisis. Pluto Press, London. 325 pp.
4. Miller GT Jr. (1996). Living in The Environment: Principles, Connections, and Solutions. 9th Edition. Wadsworth Publishing Company, New York. 727 pp.
5. Park C (2001). The Environment: Principles and Applications. 2nd Edition, Routledge Publishers, London and New York, 598 pp.

Semester: III, Course No: MARB CT-300

Course Name: Environmental Impact Assessment and Management Plans

Credits: 4

Core/Elective: Interdisciplinary/Elective CBCT

Units	Contents	Hours
Unit-1	Introduction to Environmental Impact Assessment. Environmental impact Statement and Environmental Management Plan. EIA notifications of Government of India from time to time. Guidelines for Environmental audit.	20
Unit-2	Environmental Impact Assessment (EIA) Methodologies. Generalized approach to impact Assessment. EIA processes, Scoping EIA methodologies, Procedure for reviewing Environmental impact analysis and statement. Environmental Management Plan and its monitoring, Evaluation of proposed actions.	20
Unit-3	Nexus between development and environment, Socio-economic impacts, Aid to decision making, Formulation of development actions, Sustainable development, categorization of projects under EIA, project planning and implementation, Impact prediction, Mitigation measures.	20
Unit-4	Introduction to. Selection of appropriate procedures, Restoration and rehabilitation technologies. Landuse policy for India. Urban planning for India. Rural planning and landuse pattern. Environmental priorities in India	20

Units	Contents	Hours
	and sustainable development. CRZ notifications and Environmental Impact Assessment in coastal zone. Coastal zone management plans of India.	
Total		80

Referred Text Books / References

1. W.P. Cunningham, 2010: Principles of Environmental Science.
2. Satsangi and A.Sharma 2015: Environmental Impact Assessment and Disaster Management.
3. R.R.Barthwal 2002: Environmental Impact Assessment.
4. R.Paliwal and L.Srivastava, 2014: Policy Intervention Analysis- Environmental Impact Assessment.
5. C.H.Eccleston, 2004: Environmental Impact Assessment.
6. J. Hou, 2015: New Urbanism: The future City is Here.
7. James R. Craig, 2010: Earth Resources and the Environment.
8. J. Glasson, 2011: Introduction to Environmental Impact Assessment.
9. Glasson J., Therivel R., Chadwick A, (2005): Introduction to environmental impact assessment Taylor & Francis Group, London and NewYork.
10. Morris P., Therivel R., (2009): Methods of Environmental Impact Assessment 2009, 3rdedition, Routledge, Taylor & Francis Group, London and NewYork.
11. Morris P., Therivel R., (2001): Methods of Environmental Impact Assessment 2001, 2ndedition, Spon Press, Taylor & Francis Group, London and NewYork.
12. Eccleston C. H., (2011): Environmental Impact Assessment 2011, CRC Press, Taylor &Francis Group.

Semester: III, Course No: ZOOL CT-300

Course Name: Conservation Biology

Credits: 4

Core/Elective: Interdisciplinary/Elective CBCT

Units	Contents	Hours
Unit-1 Basic Concepts	Biodiversity (genetic diversity, species diversity, ecosystem diversity) and its use, Causes of biodiversity losses, IUCN red list of threatened species, Invasive species, Alien species, Indicator species, Keystone species, Umbrella species, Flagship species, Charismatic species.	16
Unit-2 Measuring Biodiversity	Alpha, Beta and Gamma diversity , Species Richness(S), Evenness(E) , Simpson index(D), Shannon-Weiner Index (H'), idea on biodiversity calculator software.	16
Unit-3 International and National efforts for conserving biodiversity	National Act and International Act related to Biodiversity Conservation: Biological diversity Act 2002, National Biodiversity Authority, People Biodiversity Registrar, Convention on Biological diversity, Cartagena Protocol and Nagoya Protocol, Sustainable Development Goal and Biodiversity, Aichi Biodiversity Targets, CITES, WWF.	16
Unit-4	In-situ conservation (Indian context) (Sanctuaries, National and Biosphere reserves) and Ex-situ conservation (Indian context) (Botanical gardens,	16

Units	Contents	Hours
Conservation Measures and Molecular Phylogeny	zoos, cryopreservation, gene bank) NCBI data base, basic idea on phylogenetic tree, Construction and interpretation of molecular phylogeny tree based on COI and 16s rRNA gene sequences using MEGA and other tools.	
Total		64
